Abalto Back in Qatar

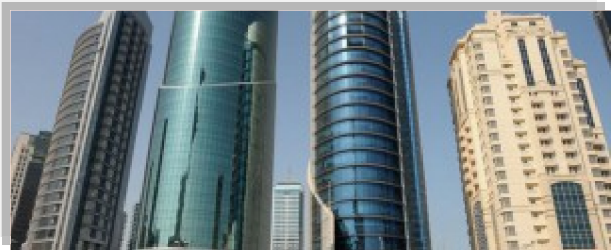

Abalto concluded the first project at Qatar Oil by successfully starting up the Dukhan Flare & Separators for Panorama a Qatar based EPC.

We are now back to carry out another shutdown with commissioning activities.

Abalto Move to New Premises

We have now moved from Birmingham to St Albans just North of London to prestigious new offices to accommodate our expansion. This serves our main purpose of being closer to the many customers to better serve them.

We hope to settle in quickly. Should there be any inconvenience to you please let us know.

Abalto in Qatar

Abalto conclude the first project at Qatar Oil by successfully starting up the Dukhan Flare & Separators for Panorama a Qatar based EPC.

Abalto were awarded the commissioning scope through the EPIC contractor Panorama Contracting &

Engineering Services working for Qatar Petroleum contract number GTC 189/ED/03 entitled EPIC of an independent Flare for QJA-1 & 2 and Replacement Separators at Dukhan Fields.

The contract scope was to replace the existing separators at both Khatia Main Degassing Station (KMDS) and Fahahil Main Degassing Station (FMDS) of Qatar Petroleum Dukhan filed in addition to the provision of new flare package at Khatia Main Pumping Station (KMPS) with all associated piping, instrumentation and commissioning. The change over from old to new separators was scheduled during planned shutdown where as the Flare package start-up was on live plant.

Abalto share of the scope was to provide the commissioning procedure, carryout the process commissioning and manage the instrumentation and logic update to ensure problem free commissioning.
